

IT'S IN THE BAG

Reducing emissions is a core value of Siam Steel Mill Services (SSMS), a joint venture between Levy and Tata Steel (Thailand), PLC. Thailand's increasing environmental regulations forced two of our customers to radically reduce emissions from their steel mill operations. Levy designed a novel building and baghouse system that confined slag pot dumping, slag digging, and truck loading indoors in an atmospherically controlled environment. This innovative solution virtually eliminates dust emissions and has led to similar emission system installations for other customers.

Siam Steel Mill Services Limited

MISSION ACCOMPLISHED

THE LEVY EMISSIONS SYSTEM ACHIEVES:

- EXCELLENT AIR QUALITY
- COMPLIANCE WITH ENVIRONMENTAL STANDARDS
- IMPROVED WORKING ENVIRONMENT
- IMPROVED COMMUNITY RELATIONS
