

# WHAT'S MINED IS YOURS

How do you provide the aggregate materials needed for growth and prosperity without sacrificing the environment in which we live? Island Lake of Novi is an excellent example of how a new community can grow out of a carefully planned, environmentally sensitive aggregate mining operation. For over 40 years, the local roads, houses, hospitals, and schools were constructed with the materials extracted from what is now a master planned community that centers around a pristine, 170-acre manmade lake.

## FROM A QUARRY TO A MASTER-PLANNED COMMUNITY

LEVY'S COMMUNITY SENSITIVE PLANS INCLUDE:

- MINING DESIGNS THAT INCORPORATE A "SECOND HARVEST," A FUTURE BENEFICIAL USE OF THE LAND
- COLLABORATIVE RELATIONSHIPS WITH LOCAL OFFICIALS AND NEIGHBORS
- ENVIRONMENTAL STEWARDSHIP TO PRESERVE FORESTS, WETLANDS, AND GREENBELTS
- STRATEGIC AND RESPONSIBLE AGGREGATE EXTRACTION AND PROCESSING
- CREATION OF CLEAN LAKES AND ATTRACTIVE LANDSCAPES
- PARKS, TRAILS, MARINAS, RESERVOIRS, GOLF COURSES, AND OTHER COMMUNITY AMENITIES

At Levy, we mine with a vision and dedication to build a better community for you.
