

CLEARLY, LESS IS MORE

The addition of Calumite slag as an essential raw material in the glass-making industry not only offers economic benefits but also offers clear advantages to the environment and overall product quality.

Manufactured from Blast Furnace slag, Calumite slag's 99% glassy content is economically smart and environmentally sound making it the glassmakers' raw material of choice in the production of soda-lime-silica glass. Calumite slag's improved melting efficiency produces "less" emissions and offers "more" benefits than traditional glass-making raw materials.

LESS

- REDUCED CO₂ EMISSIONS
- REDUCED NO_x EMISSIONS
- REDUCED SEED COUNTS
- REDUCED BATCH STONES
- REDUCED ENERGY CONSUMPTION
- REDUCED RAW MATERIAL CONSUMPTION

MORE

- INCREASED GLASS YIELD
- INCREASED FURNACE PULL
- IMPROVED GLASS QUALITY
- INCREASED FURNACE LIFE
- INCREASED COLOR STABILIZATION
